## Population Exposure

# 5000 7 o.8 ° W 75.1°W -Babahoyo Naranjito Macas Alianza Cristiana Pinas Barranca 5.9°S Moyobamba Chongoyape

#### PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty. https://earthquake.usgs.gov/earthquakes/eventpage/us7000ghm5#pager

#### population per 1 sq. km from Landscan **Structures**

Overall, the population in this region resides in structures that are highly vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are mud wall and reinforced/confined masonry construction.
